Inform Yourself, Inc.
Youth Development Company

Entrance into the world of Inform Yourself, Inc. is walking into a land of dreams and dreamers.

Inspired and founded in 1999 by its CEO, Patricia A. Wiley, Inform Yourself Inc. (IY) is an experience for children where dreams are fed, and imaginations are nurtured. Pat is a woman of integrity, courage and the boldness to dare to dream.

The three core pillars on which all IY programs rest are the Freedom to Think, Question and Try.

THINK

The minds of our youth need to be stretched, prodded and made uncomfortable by new ideas and experiences designed to increase their quest for information and learning. IY has a multiplicity of programs for youth designed to do just that. A child’s mind is indeed a terrible thing to waste, therefore there is no idle time in the program where children are not engaged, developing their thought processes, stimulating their quest to grow, and learning new things.

QUESTION

Learning takes place quickly when the child questions the reasons and purposes of how things work and why. In IY programs focused on Publishing, Finances and STEAM our children get to wonder aloud as they work on various project assignments that challenge and encourage them to try new experiences to take them to higher ground.

TRY

By design, the multi-tiered company is completely child-focused to build and strengthen an **I CAN DO** attitude in every child. IY Programs are designed for the child to succeed, and this success is attained when the child makes and effort to Try. There are no impossible heights for which a child reaches and therefore there are not failures in accomplishing that which is attempted. We believe that any child can achieve and become what has been seeded within them by God, despite limitations of race, class, culture or social expectations.

Inform Yourself, Inc., created learning modules specifically designed to uncover the enormous potential which lay hidden in each child. Our hands-on programs stimulate, agitate and provoke the talent energies within the child. In the creative process, they see themselves doing and achieving things that they only imagined and dreamed. In the end, they are informed, and develop a brighter vision of themselves.

You cannot teach a man anything, you can only help him discover it within himself.
